These two reservoirs are inter connected through a cross regulator constructed across the diversion channel excavated from Gomukhi River to Suvarnamukhi river. The yield available from the catchment is 4.485TMC. But the yield of 3.00 TMC was allotted and accordingly the contemplated ayacut was determined as 24,700 acres. The entire ayacut is proposed to be fed with two canals. 1) Right Main Canal and 2) Left Main Canal. An ayacut of 16,150 Acres is proposed under Right Main Canal and the ayacut of 8,550 Acres is proposed under Left Main Canal. The ayacut being irrigated is of the order of 22,500 acres.
